PROFESSIONAL SUMMARY

Full Stack Developer proficient in designing, developing, and deploying scalable web applications using React.js, Node.js, Express.js, and MongoDB. Skilled in architecting RESTful APIs, implementing JWT-based authentication, and crafting interactive, accessible, and responsive UIs with Tailwind CSS. Equally adept at both frontend and backend development, with a strong understanding of component-driven design, performance optimization, and database efficiency. Experienced in working with Agile methodologies, Git-based CI/CD workflows, and modern software development practices to deliver secure, high-performing, and maintainable applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Redux Toolkit, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Error Handling

Database: MongoDB

Tools & Platforms: Git, GitHub, Postman, Salesforce, VS Code, Vercel, Render, GitHub Actions

Concepts: API Design, Debugging, Authentication

EDUCATION

Babu Banarasi Das University

Bachelor of Technology in Computer Science and Engineering (CGPA: 7.13)

Lucknow, Uttar Pradesh

2021 – 2024

Board of Technical Education Uttar Pradesh

Diploma in Computer Science and Engineering (CGPA: 8.12)

Sitapur, Uttar Pradesh

2018 – 2021

EXPERIENCE

SmartITBox

Software Developer

Noida, Uttar Pradesh

Aug. 2025 – Present

- Use the complete lifecycle of full-stack modules using React.js, Node.js, and MongoDB — from initial design and API architecture to deployment and maintenance.
- Developed RESTful APIs and optimized server-side logic for scalability, reducing average API response time and enhancing throughput.
- Collaborated with UI/UX teams to refine application interfaces, ensuring accessibility, responsiveness, and design consistency across all devices.
- Implemented secure third-party API integrations, robust error handling, and asynchronous job processing for better data reliability.

Software Developer Intern

May. 2025 – Aug. 2025

- Assisted in the development of modular and reusable frontend components using React.js, enhancing performance and reducing code redundancy.
- Integrated multiple third-party APIs with secure token-based authentication and built automated testing workflows using Postman.
- Worked closely with backend developers to debug production issues and implement hotfixes using Git-based version control in Agile sprints.
- Enhanced user experience through responsive layouts and state management using Redux Toolkit and Tailwind CSS.

Sphinx Computers

Software Developer Intern

New Delhi, Delhi

Jun. 2022 – Aug. 2024

- Designed and developed a dynamic news portal using HTML, CSS, JavaScript, and jQuery, ensuring smooth AJAX-based content updates and responsiveness.
- Created an e-commerce prototype featuring persistent cart functionality, user interaction tracking, and lightweight UI animations.
- Implemented custom form validation, responsive layouts, and dynamic DOM manipulations to simulate end-to-end user interactions.
- Collaborated with mentors to understand real-world deployment workflows and front-end performance considerations.

PROJECTS

IgniteVerse | *React.js, Node.js, MongoDB, SQL, Tailwind CSS*

Mar. 2025

- Developed a full-stack test and evaluation platform supporting authentication, test creation, and real-time result computation using React.js and Node.js.
- Built RESTful APIs for managing tests, users, and scoring logic; optimized database queries to improve evaluation performance by 25%.
- Implemented secure JWT-based authentication and session handling, ensuring user data privacy and system integrity.
- Integrated Nodemailer to automate notification workflows for test results and user communications.
- Designed an intuitive admin dashboard for managing users and result analytics with modular components in React.js.

MeetUp Web App | *React.js, Express.js, Redux Toolkit, SQL, Tailwind CSS*

May. 2024

- Built an event management platform enabling users to create, manage, and join events with secure JWT authentication and role-based access.
- Developed Express.js backend APIs to handle event lifecycle, registration, and validation, ensuring consistency between server and client.
- Implemented Redux Toolkit for optimized state management, improving data synchronization and component rendering speed.
- Designed responsive user interfaces and applied Tailwind CSS for clean, consistent design across desktop and mobile.
- Integrated database transactions in SQL to maintain data integrity and prevent duplicate event creation.

Image to PDF Converter | *React.js, Express.js, PDF-Lib, Tailwind CSS*

Feb. 2024

- Developed a lightweight tool to convert images to PDF using client-side rendering with React.js and server-side PDF generation via Express.js.
- Implemented preview thumbnails, conversion progress indicators, and responsive design for enhanced UX.
- Added SEO-friendly routing and meta tags for better visibility in search engines.

CERTIFICATIONS

* Full Stack Web Development Training — American India Foundation, Noida (2024).
React – The Complete Guide — Academind by Maximilian Schwarzmuller (2023).
Python and Machine Learning Workshop — Techkriti IIT Kanpur (Techno Cruise).
Participant — TCS CodeVita Global Coding Contest.
